

RAMSES-II

... the ultimate audio cable
if musicality is the main topic

The Speaker Cables

The RAMSES cables are the ultimate cables for the transmission of any analog signal in high end audio systems. Here the RAMSES SC is the speaker cable in our product line, while the RAMSES BC is the bridging cable for bi-wiring speaker applications.

The Technology

The RAMSES speaker cable is based on a unique technical concept. The main objectives for this cable design were to realize an electromagnetic field between the conductors which is as homogeneous as possible, to use the thinnest possible conductors and to have the lowest possible loss in the dielectric between the conductors by using a very special natural material.

The main technical data are :

<i>wave impedance</i>	<i>about 3 Ω</i>
<i>inductance</i>	<i>< 0,01 μH/m</i>
<i>capacitance</i>	<i>about 900 pF/m</i>
<i>resistance</i>	<i>4.5 mΩ/m</i>

The Sound

The principal sound characteristics of the RAMSES speaker cable are their absolute homogeneity and neutrality, the entirely lack of any compensation effects as well as the exceptional speed and responsiveness of sound playback.

We are cocksure that you will find no other speaker cable which sounds in a really neutral hifi system more homogeneous than the RAMSES speaker cable.

The Application

The RAMSES SC speaker cable is as standard available in any desired length from 1.00 to 6.00 meter.

There are versions for single-wiring use as well as for bi-wiring and even for tri-wiring speaker applications. Bi-wiring versions can be realized by a special Y-adaptor or for optimum results by a self-contained bi-wiring cable.

For the termination we offer MC4 bananas, Neutric NL4FC plugs or high quality spades. Other special terminations are available on request if they meet our quality requirements.

The RAMSES BC are special bridging cables for bi-wiring speaker terminals. They are also available with MC4 bananas, Neutrik NL4FC plugs or spades. One set includes as standard four cables of 12 cm length.

Like any other speaker cable RAMSES needs a certain run-in time, however significantly lower than for other cable designs. After 2-3 weeks the music reproduction will achieve its absolutely perfect level.
